## MOTHER! GIVE CHILD "SYRUP OF FIGS" IF TONGUE IS COATED

CROSS, FEVERISH, SICK, BILIOUS, CLEAN LITTLE LIVER AND BOWELS.

Children love this "fruit laxative," and nothing else cleanses the tender stomach, liver and bowels so nicely. A child simply will not stop playing to empty the bowels, and the result is, they become tightly clogged with waste, liver gets sluggish, stomach sour, then your little one becomes cross, half-sick, feverish, don't eat, sleep or act naturally, breath is bad, system full of cold, has sore throat, stomach-ache or diarrhoea. Listen, mother! See if tongue is coated, then give a teaspoonful of "California Syrup of Figs," and in a few hours all the constipated waste, sour bile and undigested food passes out of the system, and you have a well, playful child again.

Millions of mothers give "California Syrup of Figs" because it is perfectly harmless; children love it, and it never fails to act on the stomach, liver and bowels.

Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has full directions for babies, children of all ages and for grown-ups plainly printed on the bottle. Beware of counterfeits sold here. Get the genuine, made by "California Fig Syrup Company." Refuse any other kind with contempt.

## FAMILY SHOULD BE TAUGHT METHODS OF PREVENTING FIRES

PREVENTION DAY IS BEING OBSERVED THROUGHOUT THE UNITED STATES.

Safety First Federation of America Has Helped Arrange Program, Emphasizing the Importance of Lessening Losses from Fires—Anniversary of Great Chicago Fire.

- What "Not to Do"
- 1—Don't permit children to play with matches.
  - 2—Don't throw away lighted matches, cigars or cigarettes.
  - 3—Don't use naphtha or benzine in the home. (A pint makes 200 feet of explosive vapor.)
  - 4—Don't block the fire-escapes; you may need them yourself, quick.
  - 5—Don't put ashes in wooden boxes or barrels.
  - 6—Don't permit accumulations of rubbish.
  - 7—Don't have lace curtains or draperies near open lights.
  - 8—Don't fill kerosene lamps or lanterns after dark.
  - 9—Don't permit matches to be kept except in a closed metal box.
  - 10—Don't forget to call for the fire department first thing; and to have some extinguishing apparatus.

NEW YORK, Oct. 9.—This is Fire Prevention Day throughout the United States.

The Safety First Federation of America, with headquarters in New York, has helped arrange programs here and elsewhere emphasizing the importance of preventing fire.

"The individual is not apt to take fire prevention to heart if fire hasn't touched anything of his," says the federation. "But he should. In 1914 in the United States and Canada alone, \$235,591,439 (nearly a quarter of a billion dollars), worth of property was destroyed by fire. That means \$6 a year loss each, if divided between every man, woman and child in the two countries."

"The biggest part of the gigantic loss could have been prevented, if the individual had been cautious!" Governors of practically all the states have asked the people to profit by the experience rules made by the federation.

"This Fire Prevention Day is the anniversary of the great Chicago fire," Frederick H. Elliott, executive secretary of the Safety First Federation, suggests that everyone read carefully the foregoing rules for fire prevention, then follow their advice.

A big fire-prevention parade started the day's program in New York. Fire Commissioner Robert Adamson rode at the head of the procession, which stretched out behind him for miles. Circulars, speeches and other means were employed to impress individuals with the need for fire prevention.

At Chicago Mayor Thompson spoke urging the people to cut down Illinois \$12,000,000 annual fire loss. Gov. Flier made a speech about it in New Jersey. Many other public

officials made speeches throughout the country on the same subject.

The first annual convention of the Safety First Federation will follow in ten days, convening in Detroit, October 19th. The fire prevention committee, comprising many prominent fire experts and engineers, will present its report containing important recommendations for adoption at this time. As soon as these measures are approved a comprehensive campaign will be instituted in every commonwealth and municipality with the view of reducing the fire hazards through the enactment of model laws and regulations.
